THE BUYER-CONTROLLED COMMERCE LAYER

AI negotiates.
You stay in control.

Set your limits once. Watch independent sellers make offers. Vowrail's deterministic gateway rejects unauthorized rounds and payments, regardless of what an AI recommends.

01 / Private buyer mandate 02 / Bounded negotiation 03 / Explicit checkout controls

Local payment simulation — no PayPal or model calls. No money moves. This is rehearsal evidence, not a verified provider integration.

Existing completed simulated receipt loaded. No new capture was requested. No PayPal calls.

● Local checkout simulation · no PayPal connection ○ Buyer model not configured; deterministic fallback

01 Your mandate

Private constraints stay with the gateway. Suppliers only see the item and public requirements.

Custom matte printing, quantity 100

Private maximum: $220.00

Intent: b9952bbf-bcc5-4227-9d84-f33bd1cc8518

Mandate expires at 00:05:28

Start a new purchase · existing records are retained

02 Negotiation console

Three independent **simulated** merchants. Their offers are not real or legally binding.

ROUND
2 / 2

STATUS
COMPLETED

Round cap reached. No further bargaining.

Ask buyer agent to evaluate eligible offers
